PROJECTS
NFL Wingman | Repo | 12/21/2021
- A single page React web application for fans to compare up-to-date NFL team stats
- Your team isn't bad, you just have the wrong stats! Debate, defend, and attack any NFL fanbase armed with a devastating arsenal of information.
- ReactJS, MongoDB, GraphQL, Node, JavaScript

D&D Round Table | Repo | 11/19/2021
- A web application to organize and communicate with your Dungeons & Dragons groups
- Everyone knows the hardest part of playing Dungeons & Dragons is organizing your adventuring parties. D&D Round Table gives DMs and players a place to communicate essential information in order to hit the first session running.
- Express, MySQL, Handlebars, Node, JavaScript

Spotiweather | Repo | 10/25/2021
- An Open Weather Map/ YouTube API driven website for matching your music to your local weather
- Music and weather can have a heavy impact on one's mood, so why not have them match? With Spotiweather, you can search your city and find music inspired by your local weather to immerse yourself in.
- JavaScript, HTML5, CSS

ADDITIONAL EXPERIENCE
Various Part Time Jobs, Columbus, OH
Laboratory Assistant (2016), Shift Lead (2017-2018), Landscaper (2019), Contractor Assistant (2020)
- I have held various part time jobs through my college career, each teaching me useful skills outside the classroom. I have received promotions and leadership roles for my work.

ACTIVITIES & INTERESTS
- Kent State Hackathon 2018, created and managed MySQL database for running social media app
- Active member of the Buckeye Standup Comedy Club (BSCC), (2019-2020)
- Completed Hobart Institute of Welding course: Welding for the Non-Welder (Dec 2017)
